WAR TRADE BOARD ISSUES NEW CONSERVATION LIST FURTHER REDUCING ITEMS REQUIRING EXPORT LICENSE

SWEEPING CUT MADE IN DECEMBER ORDER

Only About Fifty Commodities Remain Calling for Individual License as Against 900 Last October. Foreign Trade Rapidly Being Restored to Normal. Food and Materials.

A new Export Conservation List, effective January 16, and covering about 50 items as against more than 900 in the list of October 15, 1918, is announced by the War Trade Board. Practically every commodity still on the Conservation List requires the procurement of an individual export license regardless of destination.

Commodities no longer on the Conservation List require no individual export licenses for shipment to the United Kingdom, France, Italy, Belgium, or Japan, and their colonies, and to other destinations export licenses will be freely granted in most cases.

Food List Materially Reduced.

Foodstuffs on the Conservation List have been materially reduced in number since the signing of the armistice, and the same reduction is even more apparent in the case of commodities other than food.

Arms and ammunition, coal and coke, moving-picture films, quinine and its compounds, and jute yarns and jute nitrate bags are to-day practically the only considerable commodities other than food still remaining on the Conservation List. In addition to the removal of the commodities previously stated, the Board announced the removal of copra.

Rapidly Returning to Normal.

As evidence of the rapidity with which the export trade is being restored to normal, it was pointed out that this latest Export Conservation List contains only about one-quarter of the items included in the previous list, issued December 24. The reduction of regulations affecting exports has been rapid and steady ever since the signing of the armistice.

The list is as follows:

CONDITIONS IN RUSSIA AS STATED IN STATE DEPARTMENT REPORTS

According to State Department advices, Swedish press reports from Helsingfors report the bombardment of Narva from sea side, and quote the Russian newspapers as stating that since New Year's Day the people have not seen bread, the only allowance of food being a half pound of unground oats per individual. Factories and railways are reported to be coming to a standstill, and numerous disturbances taking place, which are, however, being put down by Lettish and Chinese troops. The papers also report the organizations of Chinese and Korean Bolsheviks at Petrograd resolving themselves into the Chinese labor union and the Korean national organization, who issued manifestoes to tens of thousands of Chinese and Koreans working in Russia.

A Moscow report states that at the third meeting of the labor cooperation the "communists" emerged victorious, the Mensheviks and the Centrists being deprived of their power.

LICENSES FOR IMPORTATION OF COFFEE STILL REQUIRED

The Food Administration announces that the withdrawal of special coffee rules and license requirements under the food control act have no bearing on the requirements of import licenses from the War Trade Board, and these are still required.

The War Trade Board, however, will no longer require coffee import licenses to contain the clause that all coffees must be first offered to the Sugar Equalization Board before they are offered elsewhere.

Licenses for the export of coffee are under the jurisdiction of the War Trade Board and are not at present granted. The provisions of the food control act are still in effect.

CONSULAR VISE NOT NEEDED ON MEXICAN EXPORT LICENSE

The War Trade Board announces, in a new ruling (W. T. B. R. 518), that the regulations announced in W. T. B. R. 320, issued November 19, 1918, to the effect that applications for export licenses to Mexico should have attached thereto the order from the consignee bearing the vise of an American consul, have been withdrawn. Orders for shipments to Mexico will no longer require such consular vise and need no longer be attached to the application for export license.

REFUGEES TO SWEDEN.

The Swedish Red Cross relief expedition left Libau to bring 200 Scandinavian fugitives to Sweden, according to advices to the State Department.

REGULAR ARMY OF 500,000 MEN PROPOSED IN A BILL PRESENTED TO MILITARY COMMITTEE OF THE HOUSE

MEASURE OUTLINED BY SECRETARY BAKER

Question of Military Service Not Treated—Force of Size Proposed Intended to Meet Needs of Transition Period—Principle of Promotion by Selection Above Grade of Captain.

Press statement by the Secretary of War, January 16, 1919:

The bill presented in the House Committee on Military Affairs to-day is the result of the study made by the General Staff for the creation of an army of 500,000 men, divided into such organizations and arms as have been shown by our experience in this war to be appropriate.

Army for Transition Period.

Under the law as it now is the present Army is in process of demobilization. Some provision is therefore necessary to authorize a regular army for the transition period, and until the situation growing out of this war is sufficiently clarified to enable the United States to determine the permanent military policy which will have a proper relation to its needs and obligations. No effort is made in this bill to treat the question of universal training or service, but merely to produce an army deemed adequate to meet obligations and needs which can now be foreseen.

Present Organization.

In addition to this the bill provides for the legalization of the present relations and organization in the General Staff in order to preserve what we have built up as the result of experience and growth. The present organization of the War Department is of course a wide departure from the organization which existed before we went into the war, and it is wiser to keep what we have than to go back to the beginning and start over at some future time.

Promotion By Selection.

It is a part of the purpose of this bill to enable the Government to officer the newly constituted Regular Army by retaining in the service officers of proved ability who have come in either from the

AUTOMATIC TRAIN CONTROL COMMITTEE IS APPOINTED

Director General Hines, of the United States Railroad Administration, yesterday announced the appointment, effective at once, of an automatic train-control committee, consisting of the following members: C. A. Morse, chairman, W. P. Borland, C. E. Denney, H. S. Balliett, Henry Bartlett, R. W. Bell, and J. H. Gumbes.

The automatic train-control committee had been formulated and was ready for announcement with Mr. Hiram W. Belnap as chairman. Mr. Belnap had been the head of the safety section of the Interstate Commerce Commission for some years, and as such had conducted an investigation into the merits of the various automatic train-control devices. Mr. Belnap died very suddenly and it became necessary to create a new committee on the account of the loss of his experience in service.

Announcement Circular.

In appointing the committee the Director General issued a circular outlining the duties of the committee as follows:

"The committee will proceed at once to make a study of and report upon automatic train-control devices now undergoing a test upon various lines of railroad, or available for test, with their recommendations for installation, and for the practical test of any devices now or during their investigation, made available for that purpose, which they may consider practicable and reasonably conforming to the purposes to be accomplished.

"The report of the committee would include their recommendations upon the requisites of automatic train control and their conclusions upon the mechanical or economic features on such of the devices as the committee may find available for practical use."

Personnel of Committee.

Mr. Morse the chairman of the committee, is assistant director of the division of operation.

Mr. Borland is chief of the safety section of the Interstate Commerce Commission.

Mr. Denney is assistant to the Federal manager of the New York, Chicago & St. Louis Railroad.

Mr. Balliett is signal engineer in the electric division, New York Central Railroad.

Mr. Bartlett is chief mechanical engineer on the Boston & Maine Railroad.

Mr. Bell is general superintendent of motive power, Illinois Central Railroad.

Mr. Gumbes is general superintendent, Western Pennsylvania Division, Pennsylvania Railroad.

BILL FOR REGULAR ARMY.

National Guard or from civil life during the war and who desire to make the Army a permanent career. The principle of promotion by selection rather than by strict seniority is introduced above the grade of captain. During the war, of course, promotion has been by selection, and our experience shows it to be both a wise and a just method of promotion.

RECORDS OF UNUSUAL MEDICAL CASES ARE ORDERED SENT HERE

The War Department authorizes the following from the office of the Surgeon General:

Surgeon General Ireland has directed that all records of individual surgical and medical cases of unusual interest, and such studies of large groups of infections, diseases, and injuries as may be worthy of record, be sent to Washington for purposes of analysis, compilation, and preservation.

During the stress of establishing new hospitals and enlarging the medical service to meet the requirements of the war it was impossible to compile all of the material of interest to the medical profession. Hence it is directed that reports should cover from the opening of the hospital, and include methods of treatment, splinting, treatment of shock, new apparatus, technique employed in preoperative and post-operative preparation, a discussion of the experience of the hospital in the use of various forms of anesthesia, and data regarding specific classes of cases.

RESULTS OF "LIBERTY FUEL" INVESTIGATIONS MADE PUBLIC

The United States Fuel Administration, which has received many requests for information concerning aviation fuel called "Liberty fuel," has made public information as to it, including the results of various investigations covering its composition, the available supply of ingredients, and its efficiency.

Tests made in the aeronautic laboratories of the United States Army and placed at the disposal of the Fuel Administration resulted in information that the fuel was made up of "approximately 65 per cent of benzol; 25 to 30 per cent of kerosene; and the remainder of a small percentage of amyl acetate, and probably naphthalene and alcohol, together with perhaps small quantities of dissolved solids and other volatile liquids as yet undetermined."

Available Supply.

On this analysis, it was pointed out, the available supply of the fuel must depend on the available supply of benzol, its chief constituent. Investigation in this direction showed that if the total production of benzol (3,500 barrels a day) were so used the total production of Liberty fuel would be about 2 per cent of the present output of gasoline, which is approximately 90,000,000 barrels a year. Benzol, however, has other uses, notably in grease extraction and as a solvent for rubber.

A gumming and corrosion test, also conducted in the aeronautic laboratories of the Army, showed no perceptible corrosion but "a tremendous amount of gumming; i. e., 0.4 per cent, accompanied by extensive fuming and penetrating odor." The tendency of the gummy residue in the fuel would be to plug up carbureters, Fuel Administration experts said.

In the same Army laboratory test crystallization was found to set in at 18° (Fahr.), and to be "practically complete" at 15° (Fahr.). Boiling started at 175° (Fahr.) as against an initial boiling point of not more than 140° for motor gasoline, indicating better starting qualities for motor gasoline.

The Bureau of Standards stated: "The results of tests in an aviation engine indi-

7,093 Sick and Disabled Landed in U. S. During the Week Ended on January 4

The War Department authorizes the following from the office of the Surgeon General:

During the week ended January 4 a total of 7,093 sick and disabled soldiers were received at the clearing hospitals in the United States. Of this number 3,465 arrived at Hoboken and the remaining 3,628 were received by the hospitals at Newport News. These men are now being sent to the various army hospitals, where special facilities for their physical reconstruction have been provided.

cated that 'Liberty fuel,' compared with gasoline fulfilling the export specifications for aviation gasoline will, when consuming 10 per cent greater weight of fuel per horsepower hour, develop about 3 per cent greater horsepower. The (spark) plug used in 'Liberty fuel' showed a slightly greater carbon deposit than the plugs used in the run of export gasoline."

Information furnished the Fuel Administration by the Navy Department stated that a flight of 40 minutes was made with the fuel, and that "no observations were made which show that the fuel would accomplish any other results than to operate the engine in a manner similar to the aviation fuel which had been used." Arrangements were made, the Navy Department reported, for sufficient quantities of the fuel to make full tests, but the fuel was not supplied.

A letter from Benedict Crowell, assistant secretary of War, said:

"The situation has not reached such a stage that this office feels that any definite announcement can be made, or that it can express a definite opinion as to the true merits of the fuel."

The Bureau of Mines reported that it was approached, but, on asking for the formula in order to compound the material and being refused, dropped the matter, declining to act under the circumstances.

SEALED PROPOSALS INVITED

INTERIOR DEPARTMENT.

Proposals will be received at the United States Indian warehouse, No. 308 South Green Street, Chicago, Ill., until 10 a. m. January 20, for furnishing one motor-driven filter for the filtering and drying of transformer oil and one circulation pump with a capacity of 50 gallons per minute.

RATED AS RESERVE AVIATORS.

List Recently Announced of Officers in the Army Air Service.

The Department of Military Aeronautics issues the following:

The following officers of the Air Service have recently been rated as Reserve Military Aviators:

Capt. Jacob S. Schlusel, Second Lieut. Stanton T. Smith, First Lieut. James C. Fair, Second Lieut. Ferris F. Hamilton, Second Lieut. Russel F. Swift, Second Lieut. Harry C. Fisk, jr., Second Lieut. C. J. Fuller, First Lieut. Sydney H. Macbey, Second Lieut. Wm. L. Pancher, Second Lieut. Hugh F. Porter.

PARCEL-POST SERVICE BEGUN BETWEEN THE U. S. AND SIAM

Vice Consul Carl C. Hansen, at Bangkok, Siam, reports:

The Siamese director general of posts and telegraphs has officially notified the American consulate at Bangkok that parcel-post service between Siam and the United States via "Hongkong-Pacific" came into operation as from October 10, 1918. The rate from Siam to the United States is 95 stangs (about 35 cents gold) for parcels up to 1 pound in weight, and 40 stangs (13 cents gold) for each additional pound, each parcel being limited to 11 pounds in weight. From the United States to Siam parcels can be prepaid only as far as Hongkong, and in order to cover the cost of transmission from the latter place to Bangkok the recipient must pay 95 stangs (about 35 cents gold) for each parcel.

In Operation with Europe.

Parcel-post exchange between Siam and most of the European countries has been in operation for many years past, and during the fiscal twelvemonth ended March 31, 1916, 11,557 parcels were received in Siam from these countries, against 10,179 and 24,001 packages during 1915 and 1914, respectively, while none were received from the United States.

Aside from the great convenience which the parcel post will afford to American residents in Siam in readily procuring supplies in moderate quantities of articles to the use of which they have been accustomed in the homeland, but which generally were unobtainable locally, this new arrangement is sure to bring about more extensive trade activities between the respective countries.

Certain Facilities Lacking.

However, lack of American shipping, banking, and post-office money-order facilities are some of the drawbacks which yet remain to be removed in order that complete commercial relations may be established between the United States and Siam.

NEW DIRECTOR OF OPERATION.

The United States Railroad Administration issues the following:

CIRCULAR No. 71.

Effective January 15, 1919, Mr. W. T. Tyler, heretofore senior assistant director, division of operation, is appointed director, division of operation, succeeding Mr. Carl R. Gray, whose resignation has heretofore been announced.

WALKER D. HINES,
Director General of Railroads.

PROCEEDINGS OF THE CONGRESS BRIEFLY TOLD

SENATE.

The Senate occupied the day in consideration of the bill providing for taking the census of 1920. An amendment was adopted providing that appointees for supervisors shall be selected from civil-service lists. Another amendment adopted would give honorably discharged soldiers and widows of those who died in action preference in the appointment of enumerators. During the debate, Senator King, Democrat, of Utah, warned against extravagance in appropriations, and said it would react against the party responsible for waste of public funds.

The conferees on the war-revenue bill agreed upon the Senate amendment placing a prohibitive tax upon the products of child labor entering into interstate commerce. They also accepted the Senate amendment, restoring 2-cent letter postage and 1-cent postal cards July 1 next.

The resolution of Senator Phelan, providing that the giant red wood region in California, known now as the Sequoia Reservation, shall be called the Roosevelt National Park, was favorably reported by the Public Lands Committee.

Before the committee investigating German propaganda Senator Thomas, Democrat, of Colorado, denounced Austin J. Smith, who testified concerning an alleged agreement between the proprietors of the Pueblo Chieftain and former Ambassador Bernstorff to publish pro-German articles for pay as "an unmitigated liar." He testified to the character of the proprietors of the paper and said it could be shown that Smith was seeking to collect blackmail. Before the Interstate Commerce Committee, A. P. Thom, counsel for the Association of Railway Executives, continued his argument against the proposal to extend Government operation of railroads for a five-year period. Representatives of the State and Treasury Departments appeared before the Appropriations Committee in executive session and gave reasons why the \$100,000,000 food-relief bill should be promptly acted upon. Before the Naval Committee investigating the Eagle boat contracts, Rear Admiral Taylor said that, notwithstanding the best efforts of all boat builders having contracts with the Government last year, none of them was able to meet building-speed estimates. Before the Agriculture Committee Francis J. Heney continued his argument for the adoption of the pending bill for Government regulation of the packing industry.

The Senate will meet on Sunday, February 2, for memorial services on the late Senators James, of Kentucky, and Stone, of Missouri.

HOUSE.

During discussion on the legislative appropriation bill Republican Leader Mann challenged the majority to investigate expenditures of the War and Navy Departments and the war time building program. He charged that there have been "frauds, intelligent mistakes, and conscious actions." Asking the Democrats why they refused to investigate he declared that when the Republicans assumed control they would undertake the task. Representative Tilson, of Con-

necticut, Republican, in a speech, severely arraigned Army officers for, as he charged, not acting in good faith in handling applications for discharges. The House tentatively adopted an amendment increasing from \$2,000 to \$3,200 the allowances granted Members of the House for clerk hire with a proviso that the money shall be paid directly to the clerks. Speaker Clark ruled out of order a proposed amendment increasing the salary of Members of Congress from \$7,500 to \$10,000.

Before the Immigration Committee representatives of the New York Hebrew Immigration Aid Society and other similar bodies opposed legislation prohibiting immigration after the peace treaty as unnecessary. Representative Moore, of Pennsylvania, cautioned the committee to deliberate carefully. He stated that coal operators and manufacturers in his State feared an inadequate labor supply. Secretary of the American Federation of Labor Morrison told the committee that organization favored stopping immigration until soldiers, sailors, and war workers get employment.

Investigation into the activities of the National Security League was continued yesterday by the select committee.

The Committee on Pensions unanimously agreed to a favorable report on the bill of Mr. Gallivan, of Massachusetts, granting a pension of \$5,000 a year to the widow of former President Roosevelt.

NATIONAL BANK RESOURCES ON NOV. 1 NEARLY 20 BILLIONS, EXCEEDING ALL PAST RECORDS

The Comptroller of the Currency authorizes the following:

The resources of the national banks of the country, at the last call, November 1, 1918, according to reports just compiled, amounted to \$19,821,404,000, and exceeded by \$1,268,207,000 the greatest resources ever before shown, the previous high-water mark having been attained on November 20, 1917. The increase in resources over the preceding statement of August 21, 1918, was \$1,777,799,000.

Growth in Last Five Years.

The growth in the resources of the national banks in the last five years has been greater than the increase which took place in the preceding twenty-five years.

The resources of the national banks now exceed by more than a billion dollars the combined resources of all the State banks, savings banks, private banks, and trust companies of the country as late as June, 1916, and are within one billion dollars of the combined resources of all other banks and trust companies, as shown by their reports of June, 1917.

The resources of the national banks of the United States at this time exceed the aggregate resources of the national banks of issue of England, the Dominion of Canada, France, Italy, the Netherlands, Norway, Sweden, Denmark, Japan, and Germany, all combined, as shown by their latest available reports.

The year 1918 has nearly passed, and thus far there has been no failure of any national bank in any State east of the Rocky Mountains, and only one failure in the entire country—a small bank in California. There has been no such immunity from failure as this since 1870, when there were only 1,615 national banks in the United States, with total resources of 1,510 million dollars, as compared with 7,754 national banks at this time, with combined resources of 19,821 million dollars.

Comparative Figures August–November.

The following figures give a comparison between the statement of August 31, 1918, and November 1, 1918:

The deposits on November 1, 1918, of the national banks aggregated 15,051 million dollars, an increase of 1,165 million dollars.

Loans and discounts, November 1, 1918, amounted to 10,097 million dollars, an increase of 608 million dollars.

Bills payable and rediscounts, November 1, 1918, were 1,567 million dollars, an increase of 273 million dollars, the borrowings being principally on Liberty bonds and United States certificates of indebtedness.

The total holdings of United States bonds, including Liberty loan bonds and certificates of indebtedness, on November 1, 1918, amounted to 3,156 million dollars, an increase of 700 million dollars.

Other bonds, securities, etc., held November 1, 1918, aggregated 1,660 million dollars, a reduction over the previous call of 34 million dollars.

Capital, surplus, and undivided profits

Cash in vaults due from Federal Reserve Banks November 1, 1918, amounted to 1,803 million dollars, an increase of 131 million dollars over the preceding call.

The increases in resources are widely distributed throughout the whole country. Of the above net increase of 1,777 million dollars shown, as compared with August 31, 1918, 592 million dollars was in the national banks of the central reserve cities, 623 million dollars in the national banks of other reserve cities, and 562 million dollars in the country national banks.

Resources in Cities.

The cities whose national banks reported the greatest increases in total resources were: New York City, 507 mil-

lion; Philadelphia, 161 million; Boston, 149 million; Chicago, 56 million; Pittsburgh, 45 million; St. Louis, 28 million; Richmond, 23 million; Portland, 21 million; Minneapolis, 20 million; Buffalo and San Francisco, 17 million each; St. Paul, 13 million; Atlanta and New Orleans, 12 million each; Dallas and Cleveland, 12 million each.

The only city whose national banks showed a reduction of as much as five millions was Kansas City.

The country banks showed a material increase in every State of the Union except Nebraska, Kansas, Ohio, and Illinois, and in none of these four States did the reduction amount to as much as 5 millions.

The States whose country banks showed an increase in resources of 10 millions or more were: New York, 68 millions; Pennsylvania, 57 millions; Massachusetts, 54 millions; New Jersey, 51 millions; Minnesota and North Dakota, 25 millions each; Connecticut, 21 millions; South Carolina, Texas, and Virginia, 18 millions each; California, 17 millions; North Carolina, 16 millions; Georgia, 14 millions; Alabama, Mississippi, and Arkansas 11 millions each; Indiana, 10 millions.

Cash and Other Holdings.

The cash which the national banks had on hand and with Federal reserve agents on November 1, 1918, if added to their holdings of all United States bonds and certificates of indebtedness, makes a total of \$4,959,773,000.

This sum, after deducting the amount of United States bonds held as a basis for circulation, is equal to about 28 per cent of the total deposits of all national banks, but allowance must be made for the United States bonds and certificates of indebtedness owned by the banks but which may be pledged as security for bills payable or rediscounts.
